ERRATUM: Due to technical difficulties, we accidentally omitted this figure in the article on "Middle Age Issues" (September 2002). We apologize to our readers and to the author, Dr. Mark Yaffe, for this omission.

Life Cycle Constellations

The human life cycle is divided into different stages, each accompanied by specific predictable developmental tasks or challenges that a person may face. They may be easy and pleasant, or disruptive and painful, dependent on one's age, sex and socioeconomic determinants. Since the eleven developmental tasks for middle age were established, it has become clear they may be also influenced by differing cultural practices and by a myriad of personal, family or lifestyle constellations.
